Cloud Backup Robot Crack + 2022 [New]

Cloud Backup Robot is a comprehensive and reliable software solution whose main purpose resides in offering you the means of regularly creating copies of your data, be it files, folders or SQL databases. Wizard-based functioning The

---

application resorts to using a wizard in order to guide you through every step of the operation and ensure its success, even if you are not fully experienced with such tools.

Once all the steps are completed, Cloud Backup Robot lists the tasks in its main window; there, it allows you to run backups on demand, edit their running parameters or remove them from the queue altogether. Swiftly schedule

---

backup tasks for files, folders and databases. When creating a new job, you will firstly need to opt between 'Files & Folders' or 'Microsoft SQL Server', the latter requiring you to have access to the targeted database and possibly specify the login credentials. Consequently, you can assign the entry a name, then add the items you wish to backup. In the case of 'Files & Folders', you simply have to indicate the path where they are

---

stored. However, the ‘File Filters’ let you be more specific about which formats to include and exclude from the operation.

Optionally, you can activate archive encryption. Moreover, Cloud Backup Robot allows you to add several different destinations, including local and cloud-based ones (Google Drive, OneDrive, Dropbox, Amazon S3, Box), as well as network folders or FTP / FTPS / SFTP servers. The operation can occur

---

on demand or on a schedule, several times a day, a week or a month, enabling you to define the precise time and date when it should run, so as not to interfere with your regular activity. A straightforward backup instrument In conclusion, Cloud Backup Robot is an efficient and intuitive program which can assist you in creating as many copies of your essential data as you need, thus making sure that

---

if your system were to crash or be infected by a virus, you would not lose everything you worked on.
